

Anagram Crosswords

The clues that you are familiar with from the quick crosswords are replaced with a jumble of letters in an anagram crossword. As you can probably deduce from the name of the puzzle, those letter jumbles are anagrams of the answer words, and you must crack them to solve the puzzle. On occasion there will be more than one possible word that could fit an anagram (for instance SAET has many possible answers such as SEAT, SATE, EATS, TEAS) – where this occurs you’ll need to cross-reference with other answers to whittle down the options to the correct anagram.
